Chisinau, Moldova

Bachelor of Applied Informatics,
Moldova State University,
Chisinau (2020 promotion)

Tech Stack: React Native, React,
JS, TS, Redux, RTK Query,
NextJS, GIT

I currently work with React Native/React and prioritize teamwork, code review, documentation, and open discussions. I have a passion for continuous learning and aspire to become a seasoned developer who can mentor and guide new developers. You can find me on [LinkedIn](#), [GitHub](#), [LeetCode](#).

- **React / React Native Developer, EasyPlan, Chisinau** (*Mar 2022 - Present*)
As a mobile developer, I was responsible for creating a new app from scratch for dental clinic management. For the web app, my main focus was on the calendar scheduler, which utilizes sockets. The scheduler includes features such as appointments overlay, day/week/month view options, column view based on doctors or cabinets, and the ability to display pauses and day offs.
- **React Developer, Opentech, Chisinau** (*May 2021 – Mar 2022*)
I worked at a top selling web domain marketplace. I built features such as the shopping cart, wish list, and pre-order domains. Additionally, I developed the UI for mobile, grid, and list layouts. One of the challenging aspects of the project was working with the profiler to inspect app performance and writing some backend services.
- **React Native Developer, Fin Tech Lab, Chisinau** (*Oct 2020 – May 2021*)
Volt is a fin-tech mobile app that I worked on. My main focus was to develop different types of user lists, animations and write unit tests.
- **React Native Developer, GoParrot, Chisinau** (*Jun 2020 – Aug 2020*)
I worked on a restaurant ordering app with multiple variants for each reseller. Main feature developed by me was ordering page.
- **React Native, Personal Project** (*Mar 2020 – May 2020*)
It was my starting point to learn React Native. Check out project [Tineret App](#).
- **Python Developer, Next Generation Team, Chisinau** (*Aug 2018 – Dec 2019*)
I started with an internship and after get involved in 2D dental CAD desktop app. Overall, I contributed to the features like custom teeth creation and pagination.
- **Languages:**
Romanian – Native Russian – Advanced English – Upper Intermediate
